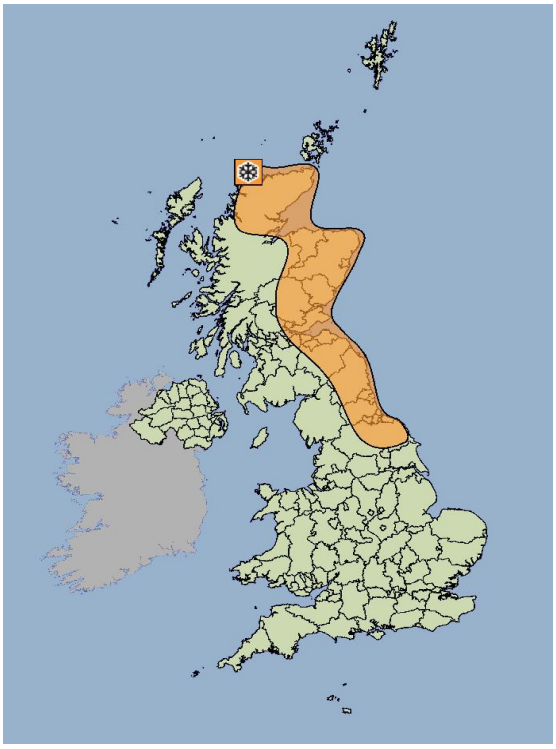
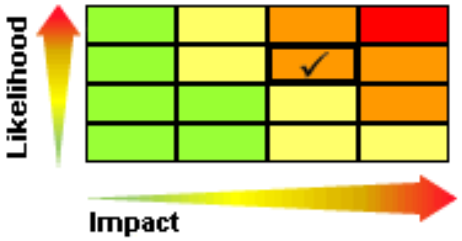
National Severe Weather Warning Service





Chief Forecasters Assessment
Snow showers will bring variable snow cover, but parts of northeast England and Scotland are expected to see the most frequent and, at times, organised snow showers. 5-10 cm of snow is expected quite widely with locally 10-20 cm possible. Strong winds will lead to drifting of snow and severe wind chill, while lightning could be an additional hazard, particularly near coasts.

The Met Office have issued an **Amber Warning** of **Snow**

Valid from **04:00 on Wed, 28th Feb 2018** until **21:00 on Wed, 28th Feb 2018**

Heavy snow showers are expected on Wednesday.

Travel delays on roads are likely, stranding some vehicles and passengers. Some delays and cancellations to rail and air travel are likely. There is a good chance that some rural communities could become cut off. Power cuts are likely and other services, such as mobile phones, may be affected.
